

DPR-400

PROTECTION RELAY

DESCRIPTION

DPR-400 is a directional protection relay in standard panel dimensions. Thanks to its low depth, it provides space economy in panels. The large color screen allows simultaneous display of multiple measurements.

The DPR-400 features dual current measurement circuits. It is both a precise analyzer and a 50xIn protection relay.

Through RS-485 and ethernet comports, the unit is easily connected to Scada and automation systems. Parameter adjustment is done through the USB or ethernet ports.

The basic unit offers 4 digital inputs and 4 relay outputs. 12 inputs and 12 relay outputs are optionally available.
